NEW SINGLE SIGN-ON (SSO) PRODUCT GUARANTEES 100% COVERAGE

ENTERPRISE SSO MANAGER FROM TOOLS4EVER REVOLUTIONIZES IDENTITY AND ACCESS MANAGEMENT

LYNBROOK, NEW YORK (April 9, 2009)—Tools4ever announces the expansion of its Identity Management product portfolio with the launch of a new Enterprise SSO Manager (E-SSO-M), a revolutionary Single Sign-On solution.

With its guaranteed 100% SSO coverage of the application landscape, including both network and internet applications, Enterprise SSO Manager sets a new standard for Enterprise SSO.

Enterprise SSO Manager is a flexible solution designed with a revolutionary concept. Enterprise SSO Manager is based on a unique building block system that does not depend on application APIs or fixed pre-build application templates. No other comparable products are designed with type of architecture. This exclusive Tools4ever concept allows guaranteed support of the application landscape and easy adjustments to fit clients exact requirements. In addition to user provisioning and password management, Tools4ever now delivers an SSO product, with accompanying consultancy services, to offer complete solutions in the field of Identity and Access Management.

Like other Tools4ever products, Enterprise SSO Manager delivers high functionality at extremely competitive pricing. Please contact the nearest Tools4ever office for product and pricing information for your organization.
