

Tools4ever announces AdminMagic 2

Baarn, The Netherlands – January, 2004 - Tools4ever, leading provider of Disk Quota, User Management and Network Management software for all Windows platforms, announced the launch of AdminMagic 2, a completely new version of its popular remote desktop control tool. AdminMagic 2 improves upon performance, reliability and ease of use when controlling remote computers.

New feature highlights of AdminMagic 2:

1. **New screen engine:** AdminMagic 2 sports a completely new screen engine built from the ground up for maximum performance. Remote controlling PCs in a local area network results in near real-time screen updates.
2. **Wizard-based remote agent deployment:** when launched, AdminMagic 2 improves on ease of use by showing a configuration wizard. This wizard shows you the basics of remote deploying a software agent.
3. **Remote authentication:** a major improvement over the previous version, AdminMagic now features remote authentication, meaning that you can deploy a remote agent using different credentials than your current logon account. This greatly improves usability when connecting to remote sites.

Pricing and Availability

AdminMagic 2 is available at no additional cost to current owners of AdminMagic. First-time buyers can purchase an AdminMagic 2 license for 1 system administrator for \$99.00 (US) or a site license for \$499.00 (US) as an electronic software download. Quotes can be requested online at <http://www.tools4ever.com/> or by calling (516) 482-4414. Additional information concerning pricing, licensing, and support policies is also available through these sources.
