

Stop Managing Identity with Scripts and Manual Processes

It's Slowing You Down. Creating Risk. And It Doesn't Scale.

- ✓ Provision users automatically, no scripts required
- ✓ Keep all systems aligned in real time
- ✓ Gain full visibility for audits and compliance
- ✓ Instantly update or remove access

The Challenge

Manually managing user access across systems can be complex, inconsistent, and error-prone, which leads to delays, security gaps, and audit challenges.

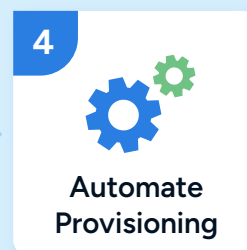

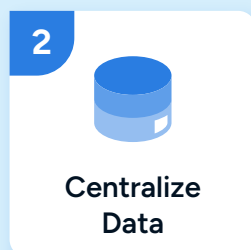

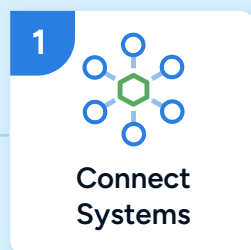

The Solution

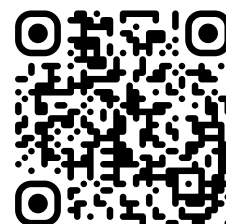

NexGen Identity Management (NIM) is a user provisioning solution that connects your systems and automatically ensures the right access.

Automate User Provisioning. Enforce Control. Eliminate Manual Work.

How NIM Works

No Scripts. No Delays. No Gaps.

Go Beyond Identity Management

Automate Access, Enforce Control, and Scale Across Every System

What Makes NIM Different

Delegated Workflows

Enable managers and teams to handle requests securely

Reusable App Portability

Move workflows across environments with ease

Custom Applications & Automation

Build workflows tailored to your organization

Centralized Data + ETL Engine

Aggregate and synchronize identity data across all systems

Enforced Source of Truth

Automatically correct inconsistencies and eliminate data drift

Built for Real-World Environments

Easily manage high user volumes and constant changes

Security & Compliance Built In

- ✓ Immediate Deprovisioning
- ✓ Full Audit Trails and Reporting
- ✓ Role-Based Access Enforcement
- ✓ PGP-Encrypted Data Exchange

The Impact

- ✓ Eliminate Manual Provisioning and Scripting
- ✓ Reduce Helpdesk Workload
- ✓ Improve Data Accuracy Across Systems
- ✓ Strengthen Security and Compliance
- ✓ Scale Without Increasing IT Overhead

Key Integrations

Commercial & Education
