UNLEASH THE POWER OF DATA

eSD GURU simplifies the day-to-day tasks of users and empowers them with data in an interactive, graphical format.

eSchoolData is proud to partner with best-in-class solutions to provide a seamless experience for our mutual customers.

Whether you need to generate a data extract, automatically authenticate to a third-party product, or provide access to get and post data via our API, **eSD GURU** has a solution to meet your specific needs.

The Identity & Access Manager (IAM) solution enables the provisioning, self-service, delegation and governance of user accounts. It automates the entire user lifecycle by integrating with eSchoolData and creating accounts in Active Directory, Office 365, G Suite and many others. From one single point of entry, IAM can provision, move, disable and delete accounts as well as manage groups and home directories.

Districts that choose eSchoolData and IAM can immediately experience the benefits of integration. With IAM's automation feature, you no longer have to worry about data duplication or dread summer's 'busy season' of account creation.

Other features of IAM include:

✓ Workflow Management & Self-Service
✓ Helpdesk Delegation
✓ Access Governance
✓ Downstream Provisioning

We are proud of our relationship and high level of integration with eSchoolData. Once a client adopts eSD GURU, our automation software seamlessly integrates. The eSD to IAM connector is automatically provided for every eSD customer.

About Tools4ever

For over 20 years, Tools4ever has been providing Identity and Access Management software solutions. With a simple, phased implementation, their expert team can implement a fully automated identity management solution in just days.

Tools4ever also provides solutions for self-service password reset and a secure, cloud-based Single Sign-On solution.
